

PAY FOR STAY™

Intellitech is the national private sector leader in the development of Pay For Stay™ software, a system used by many counties across the country to track the costs of incarcerating inmates and assess the inmates for a portion of those costs. Pay For Stay™ is more than an innovative software package, it's a comprehensive program that enables you to maximize inmate collections, minimize the need for dedicated personnel and eliminate potential legal pitfalls of collections.

IMACS

Our jail management software, Incarceration Management and Cost-Recovery System, tracks, monitors and profiles an inmate's incarceration from the initial booking. Every relevant detail of the inmate's incarceration or criminal history is recorded in our IMACS database and can be easily accessed by officers. This management system makes it easier than ever to manage and track inmates in the correctional facility.

ABOUT INTELLITECH

At the Intellitech Corporation we develop intelligent and innovative software systems and business solutions for government agencies with a focus on incarceration-related applications. But we're much more than a technology firm. We employ a staff of skilled software developers, collections professionals and experienced legal team.

Since our founding in 1997, we've grown to become the nationally recognized leader in solutions for government and correctional facilities across the country.

**“WE CAN CUSTOMIZE OUR SERVICES
TO FULFILL YOUR COURT SYSTEM’S NEEDS.”**

WE BELIEVE IN THREE KEYS TO SUCCESSFUL COLLECTIONS MANAGEMENT

- ✓ - Technology
- ✓ - Expert staffing
- ✓ - Business practices

The technology and software systems we've developed and use at Intellitech can easily integrate into a court system's existing technology. We also provide experienced staff members that work inside your court system to see the collection process through. From the initial meeting with defendants to setting up payment plans and follow up phone calls to invoices, our staff keeps detailed records for every case on our in-house records system to ensure that your court receives its full collection. Our process is modeled after proven business practices from more than 15 years of experience in the collections industry.

At Intellitech, we also pride ourselves on our flexibility to meet each court system's specific needs. Whether its new technology, staffing needs or following a specific business model, we can customize our services to fulfill your court system's needs.
